

COMPLIANCE. EFFICIENCY. OVERSIGHT.

PERFORMANCE MANAGEMENT

ENCOMPASS®
Fleet Management
Platform

PERFORMANCE MANAGEMENT: SIMPLIFIED & OPTIMIZED

Better driver safety and operational efficiency starts with better data.

The J. J. Keller® Encompass® Fleet Management Platform with J. J. Keller® ELDs enables you to track driver behaviors behind the wheel, so you can address performance problems fast. And with GPS tracking, you can identify out-of-route miles and optimize delivery routes in real time. Thanks to Encompass' easy-to-navigate dashboards, you get:

- › **INTERACTIVE TOOLS** for managing and scoring all aspects of driver performance, plus driver and vehicle compliance
- › **IN-DEPTH REPORTING** to identify trends and potential risks across all locations for a holistic view of compliance
- › **PROACTIVE ALERTS** for excessive speeding, hard braking and idle time incidents
- › **24/7 ONLINE ACCESS** to your fleet records and data
- › **COMPLETE VISIBILITY** to your drivers' behaviors and the ability to streamline daily tasks

J. J. KELLER® ELDs AUTOMATE PERFORMANCE MANAGEMENT

J. J. Keller's easy-to-install ELDs work with all vehicle classes to collect engine data for real-time performance reporting in the Encompass® Platform.

LOGGING & INSPECTIONS

Reduce the amount of time drivers spend logging on-duty time, and be confident your drivers are properly and regularly inspecting their vehicles. The Encompass® Platform:

- Uses patented technology to collect ELog data transmitted from the Encompass® ELD mobile app installed on drivers' smart devices and audits the data in Encompass against Parts 395 and 396
- Automates the DVIR reporting process, providing you with optional real-time vehicle inspection details to proactively manage maintenance and safety
- Alerts you to missing logs, log violations and defective DVIRs

IFTA REPORTING

Quickly and accurately manage the reporting requirements of the International Fuel Tax Agreement (IFTA). The Encompass® Platform:

- Records your drivers' GPS data for miles driven within each state and province, matching that data with the fuel records to generate complete, error-free IFTA reports

PERFORMANCE MANAGEMENT: SIMPLIFIED & OPTIMIZED (cont.)

HARD BRAKING & SPEEDING

Gain visibility to hard braking incidents that may indicate unsafe driving, and monitor your drivers' speed to identify behaviors that could lead to crashes, violations or excessive fuel use. The Encompass® Platform:

- Tracks drivers' hard braking incidents and vehicle speed
- Lets you set thresholds and receive alerts when a driver has a hard braking incident or exceeds a speeding parameter you've set
- Helps you identify hard braking and speeding behaviors that could increase your fleet's Unsafe Driving BASIC score

LOCATION TRACKING & IDLE TIME

Reduce the frequency of out-of-route miles and idle time while improving customer service. The Encompass® Platform:

- Tracks your vehicles in real time via GPS
- Provides an online breadcrumb trail showing where drivers were
- Allows you to create geofences to report drive time and mileage inside, outside and between predetermined areas
- Improves customer service by allowing you to provide more accurate estimates for deliveries
- Tracks your vehicles' idle time and gives you visibility to excessive wait times during vehicle loading and unloading
- Lets you set thresholds and automated alerts for excessive idling

DRIVER SCORECARDS

Get a complete picture of your drivers' behind-the-wheel behaviors, so you can deliver the appropriate refresher training and reward good drivers.

The Encompass® Platform:

- Collects the speeding, hard braking and idle time performance data of all drivers across all locations
- Uses that data to rank drivers according to their performance in each category
- Enables you to sort and compare drivers based on location, job class and employment status

SIMPLIFY DRIVER PERFORMANCE MANAGEMENT
